EDUCATION

Engineering Degree – IT Security and Digital Trust *2024 – Present*
ENSA Agadir, Ibn Zohr University Agadir

University Diploma in Computer Engineering *2022 – 2024*
Essaouira Higher School of Technology Essaouira

High School Diploma in Physics and Chemistry, French Option *2021 – 2022*
Zerktouni High School Marrakech

EXPERIENCE

Cybersecurity Intern – Hafdie Industrie *Jul. – Aug. 2026*
SIEM/XDR Deployment and Monitoring with Wazuh Marrakech

- Deployed and configured Wazuh, enrolled agents, and collected security logs.
- Monitored alerts and identified suspicious behavior in a virtualized environment.

Cybersecurity and Network Intern – Hafdie Industrie *Jul. – Aug. 2025*
Windows and Network Administration and Security Marrakech

- Administered Windows Server and Active Directory; configured DHCP, NAT, ACLs, and IPsec VPN.
- Deployed a virtualized environment using VMware ESXi and an Ubuntu server in a DMZ.

Web Development Intern – Marrakech Municipality *Jul. – Aug. 2023*
Website Maintenance and Enhancement Marrakech

- Updated user interfaces, fixed bugs, and maintained the website using HTML, CSS, and JavaScript.

PROJECTS

Real-Time Threat Detection – Big Data *Academic Project, 2025*

- Designed batch and streaming architectures for security log analysis using Spark, HDFS/HBase storage, and a Kafka–Spark Streaming pipeline.
- Managed active alerts in Cassandra and exposed results through a REST API. *Technologies: Hadoop, Spark, Kafka, HBase, Cassandra, Python, Docker.*

AmanGuard – Cybersecurity Mobile Application *Personal Project, 2026*

- Developed a React Native/Expo application with a FastAPI backend, REST API, and PostgreSQL database hosted on Neon.
- Deployed the backend on Vercel and implemented automated tests.

3ecom – Secure E-Commerce Platform *ENSA Project, 2025*

- Developed a Laravel-based e-commerce application with Stripe payments and an administration dashboard while considering application security risks. *Technologies: Laravel, PHP, MySQL, JavaScript, Docker.*

CyberMizo Ultimate Scanner *Personal Project, 2025*

- Developed a Python network auditing tool for TCP/UDP scanning, service identification, SSL/TLS analysis, and report generation.

SKILLS

SOC / SIEM: Wazuh, SIEM/XDR, log collection and analysis, alert monitoring, suspicious behavior detection.

Penetration Testing and Application Security: Nmap, Wireshark, Burp Suite, network reconnaissance, port scanning, Web vulnerability analysis and application security mechanisms.

Network Security: TCP/IP, VLAN, DHCP, DNS, NAT, ACLs, IPsec VPN, firewalls, DMZ, OSPF.

Systems and Virtualization: Windows Server, Active Directory, Linux, Ubuntu, Kali Linux, VMware ESXi, VirtualBox, Docker.

Big Data and Data Processing: Hadoop, HDFS, Apache Spark, Kafka, HBase, Cassandra, batch and streaming processing, data pipelines, log analysis.

Data / Machine Learning: basic knowledge of data analysis, data preprocessing and cleaning, Machine Learning, Deep Learning, classification, anomaly detection.

Development and Databases: Python, PHP, JavaScript, Java, Laravel, Next.js, FastAPI, SQL, MySQL, PostgreSQL, MongoDB, Git.

LANGUAGES & ACTIVITIES

Arabic: Native **French:** B1 **English:** B1

Activities: Organizer of CTF Info Days, 2nd edition (ENSA Agadir, 2026); member of Apps Club and ENSA Social Club; CTFs and self-training on Hack The Box and TryHackMe.
